

# Swift Blue Line Expansion (2024)

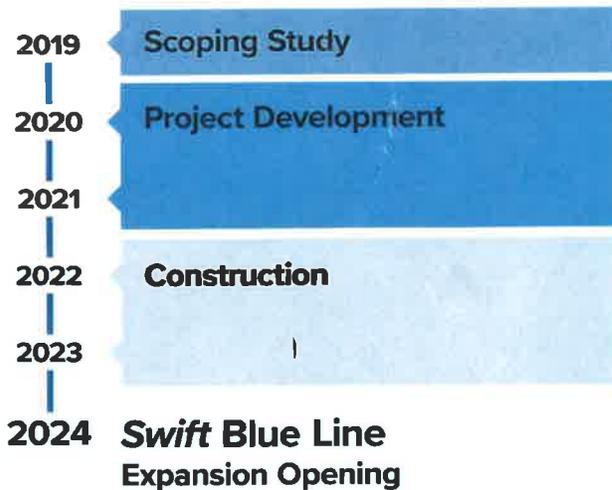

## Extension Options

As Sound Transit's Link light rail expands north into Snohomish County, Community Transit is looking at possible upgrades to the *Swift Blue* Line to give more people easy access to and from the Link light rail and *Swift* Bus Rapid Transit networks.

In 2024, the new Lynnwood Link extension will include a station in Shoreline at 185th St and I-5, less than two miles from the *Swift Blue* Line's current southern terminal at Aurora Village Transit Center.

## Project Timeline

Community Transit is now considering options to extend the *Swift Blue* Line to connect to the Shoreline North/185th light rail station, as well as evaluating improvements to the entire *Swift Blue* Line corridor.

Your input will help us determine the direction of this project to ensure that it meets the needs of the communities we serve.
