

Impact of COVID-19: King County Superior Court

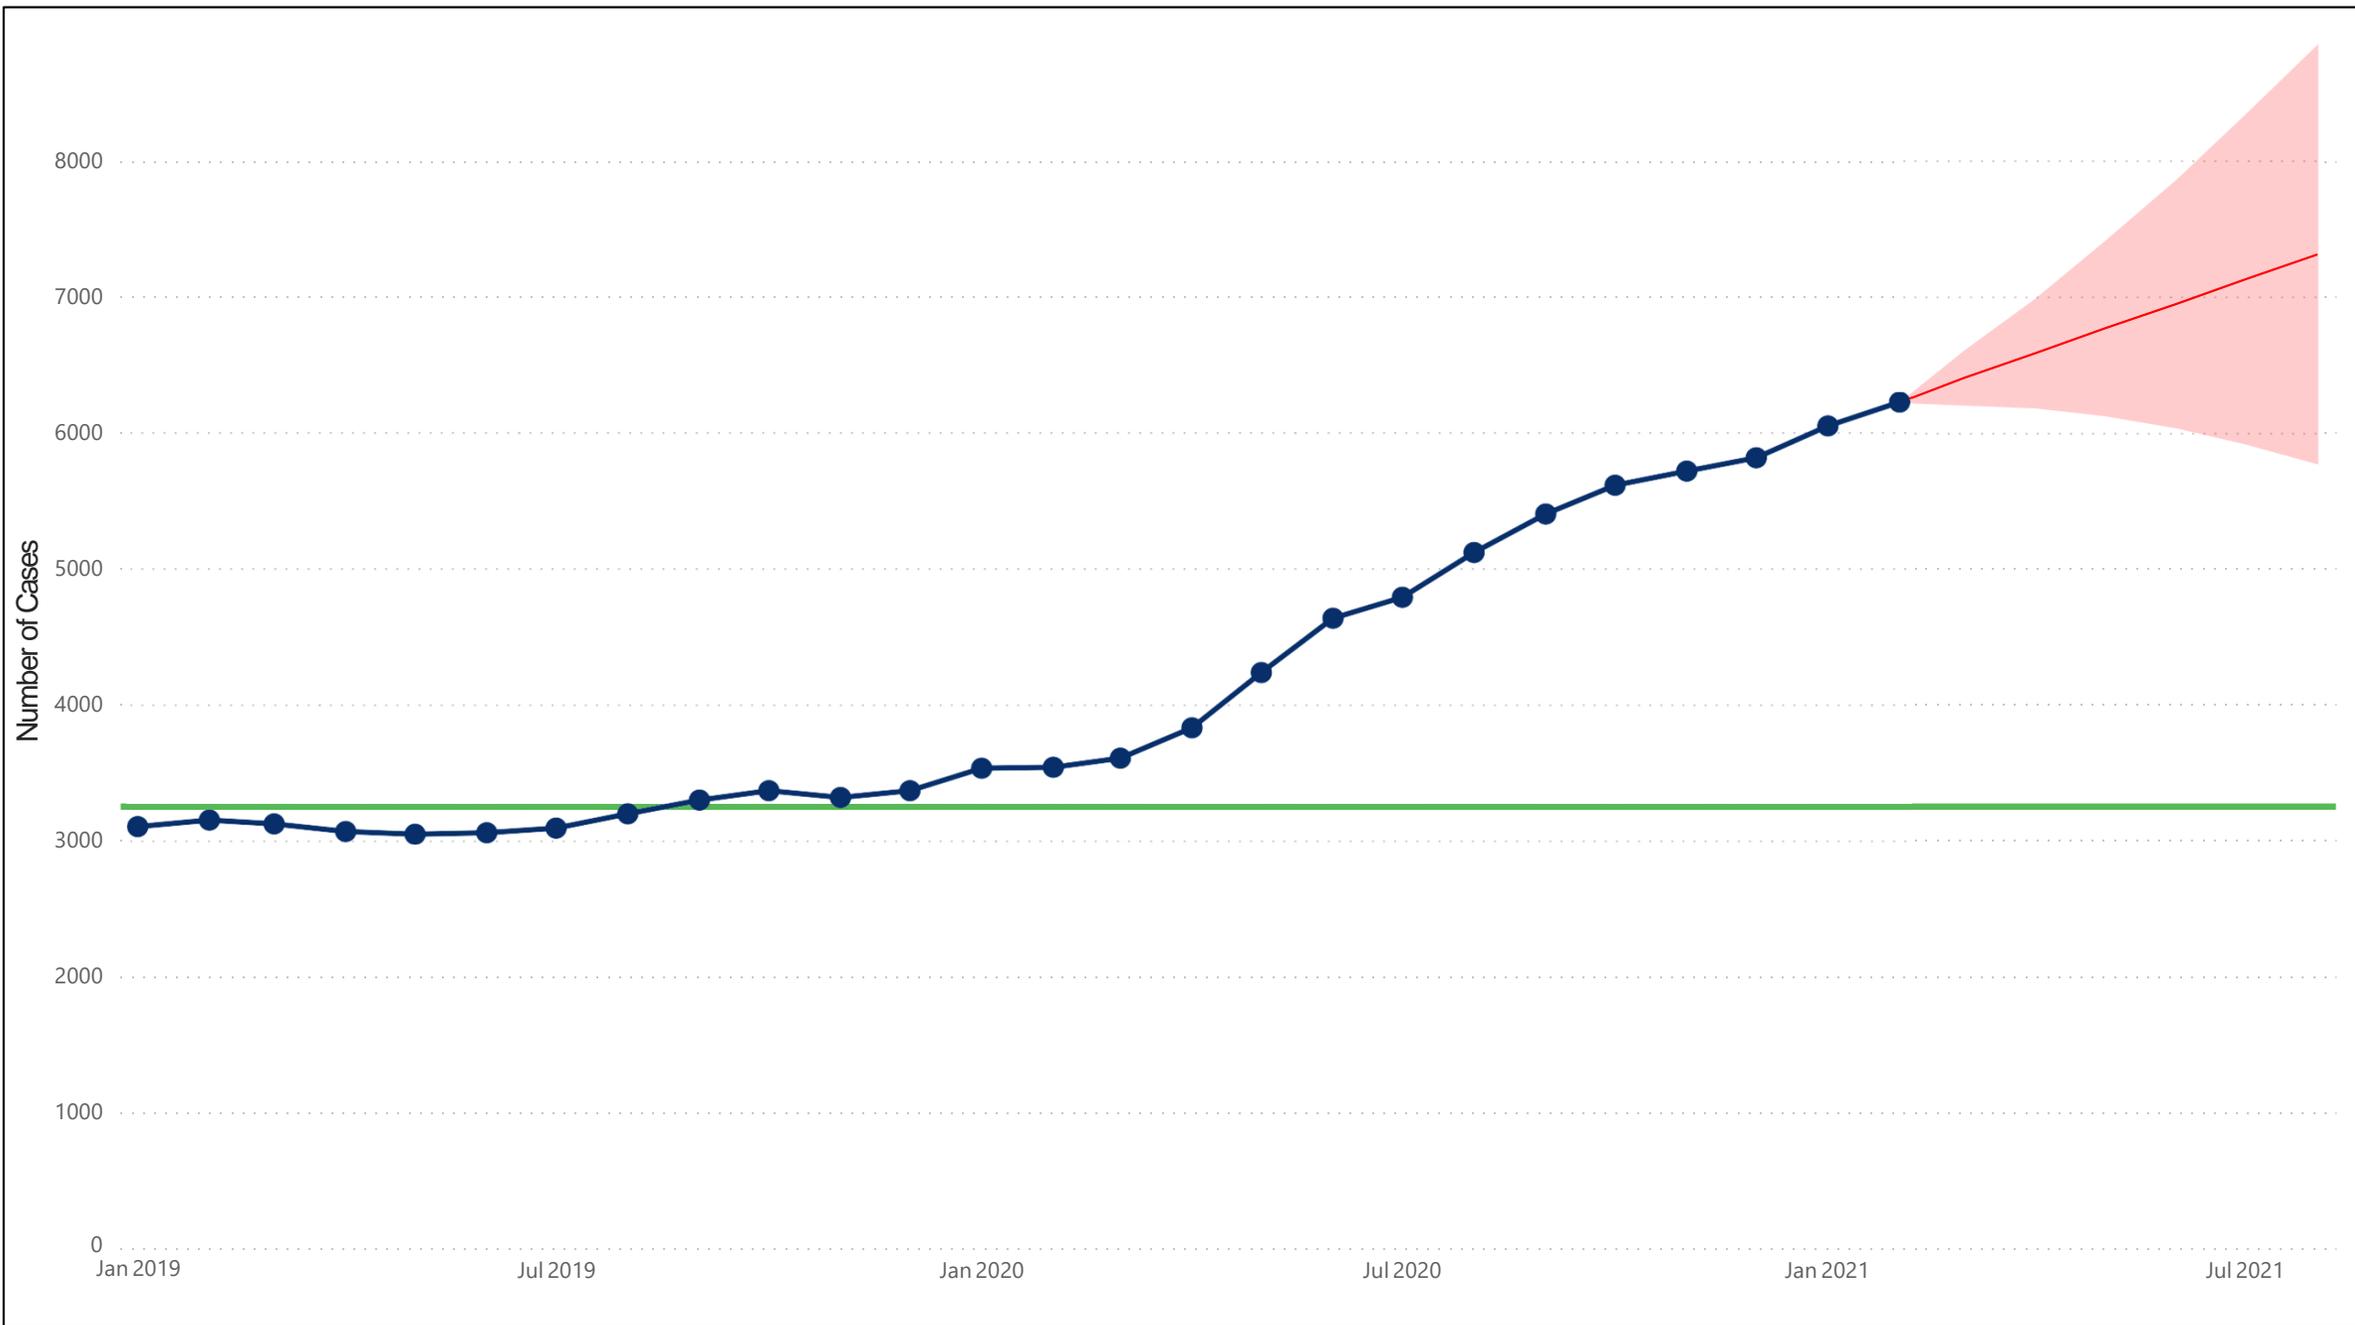

An examination by the King County Prosecuting Attorney's Office

February 2021

Current Pending Felony Caseload

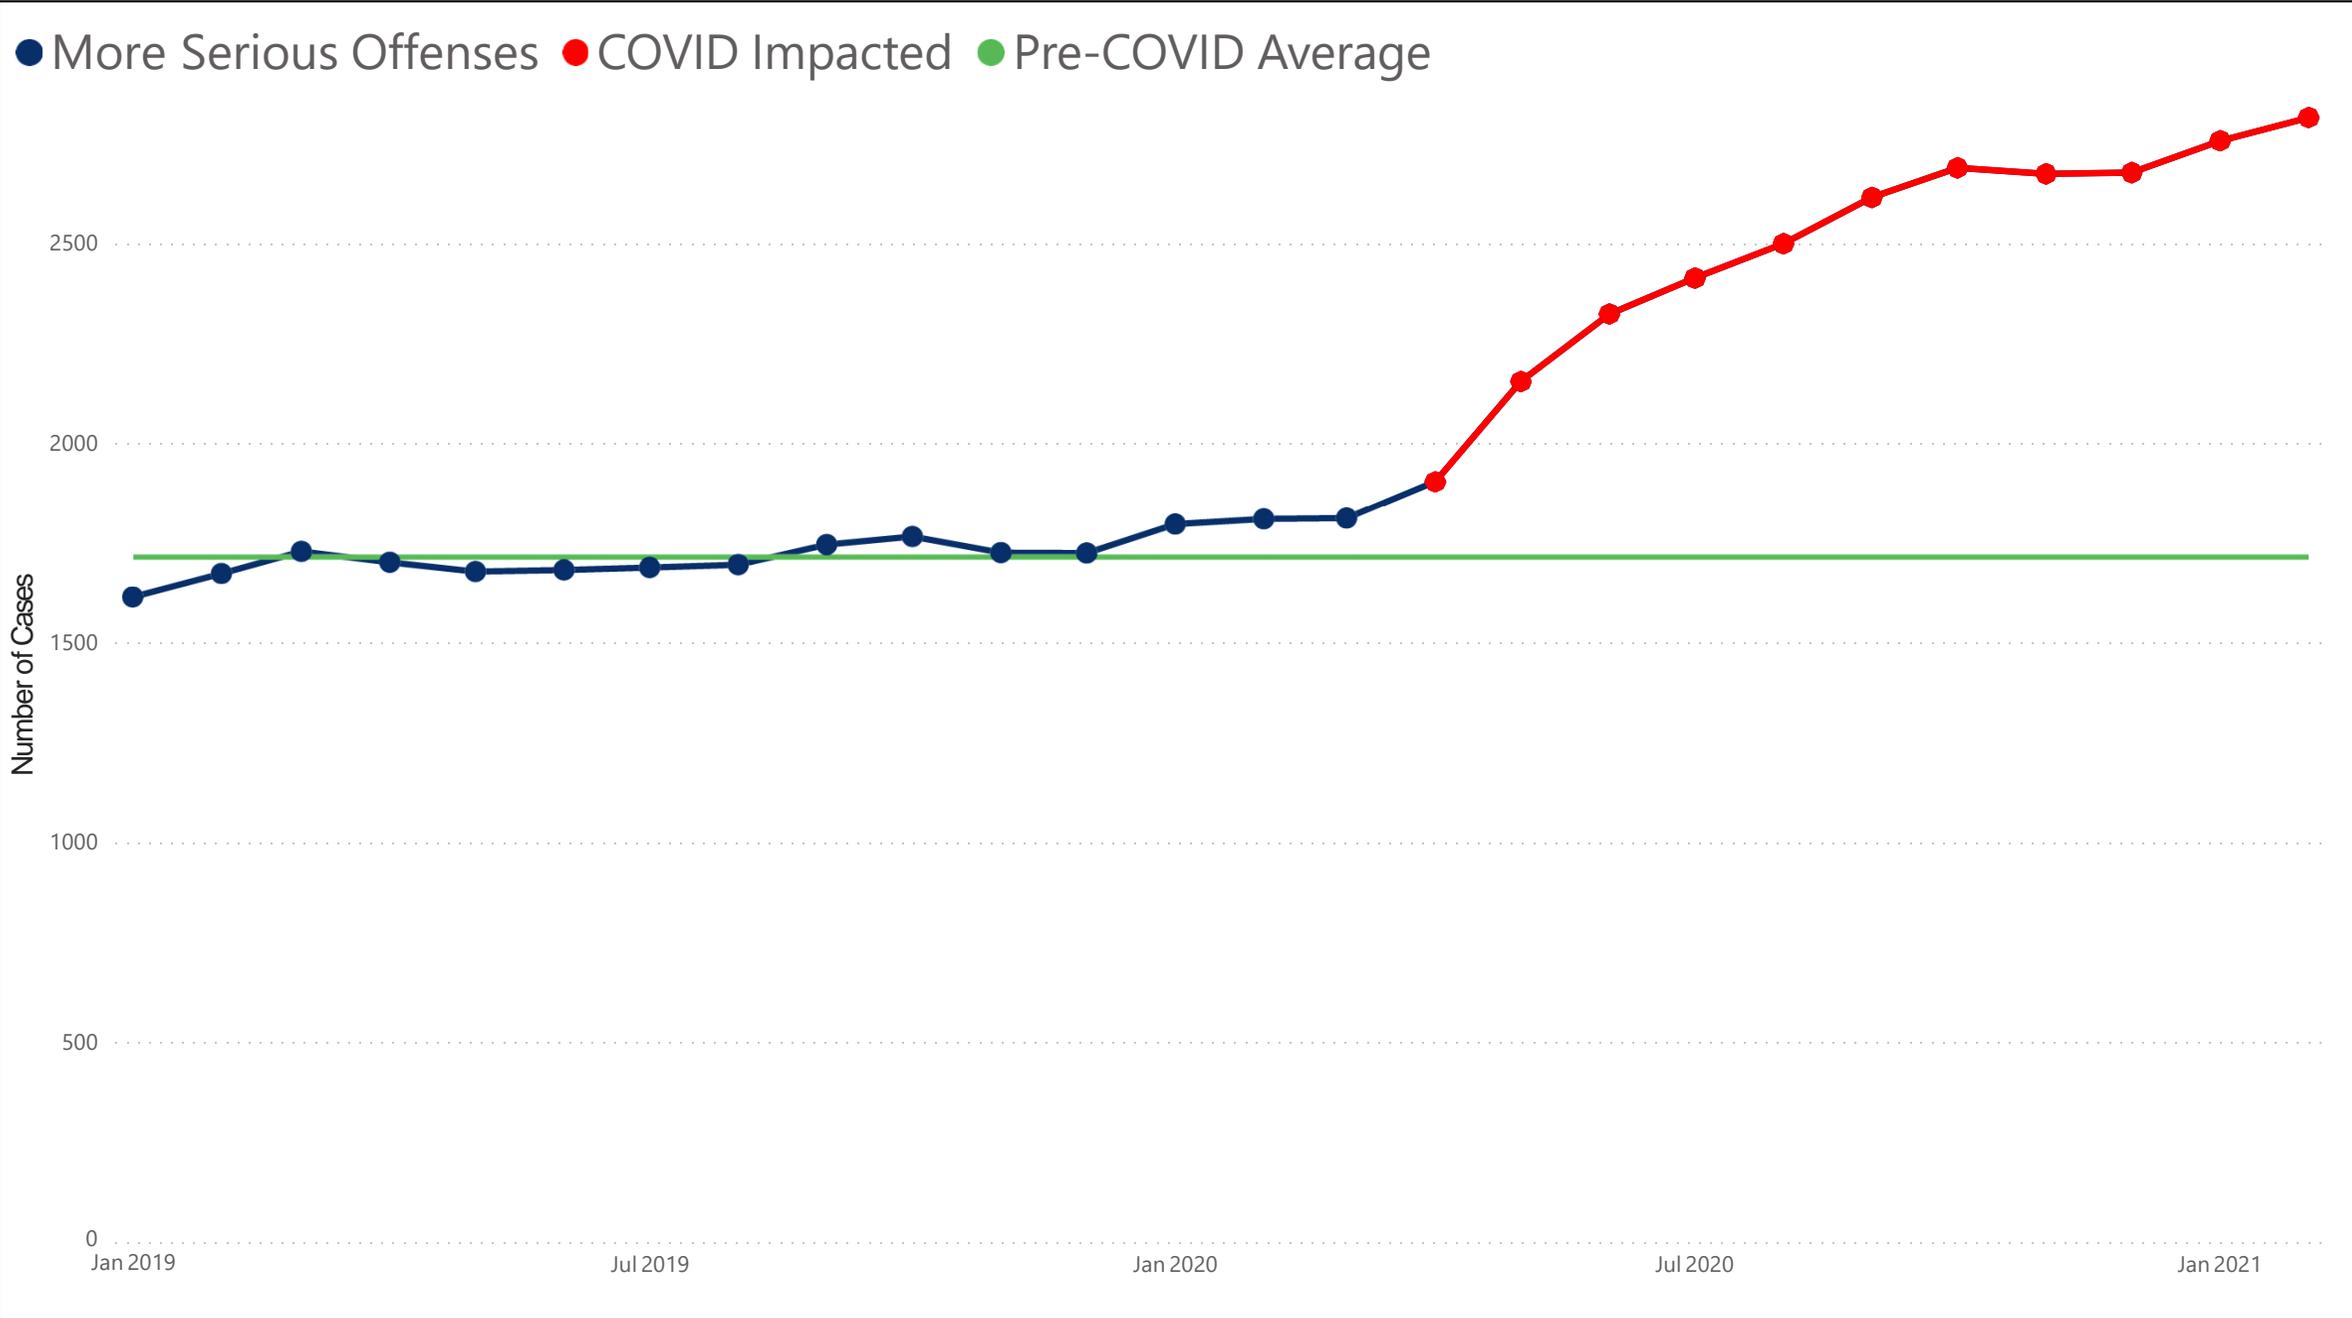

- Historically we have an average of **3250** pending felonies.
- Post-COVID we now have over **6450** pending felonies.
- By Summer 2021, that number is projected to rise to between **7000** to **9000** pending felony cases.

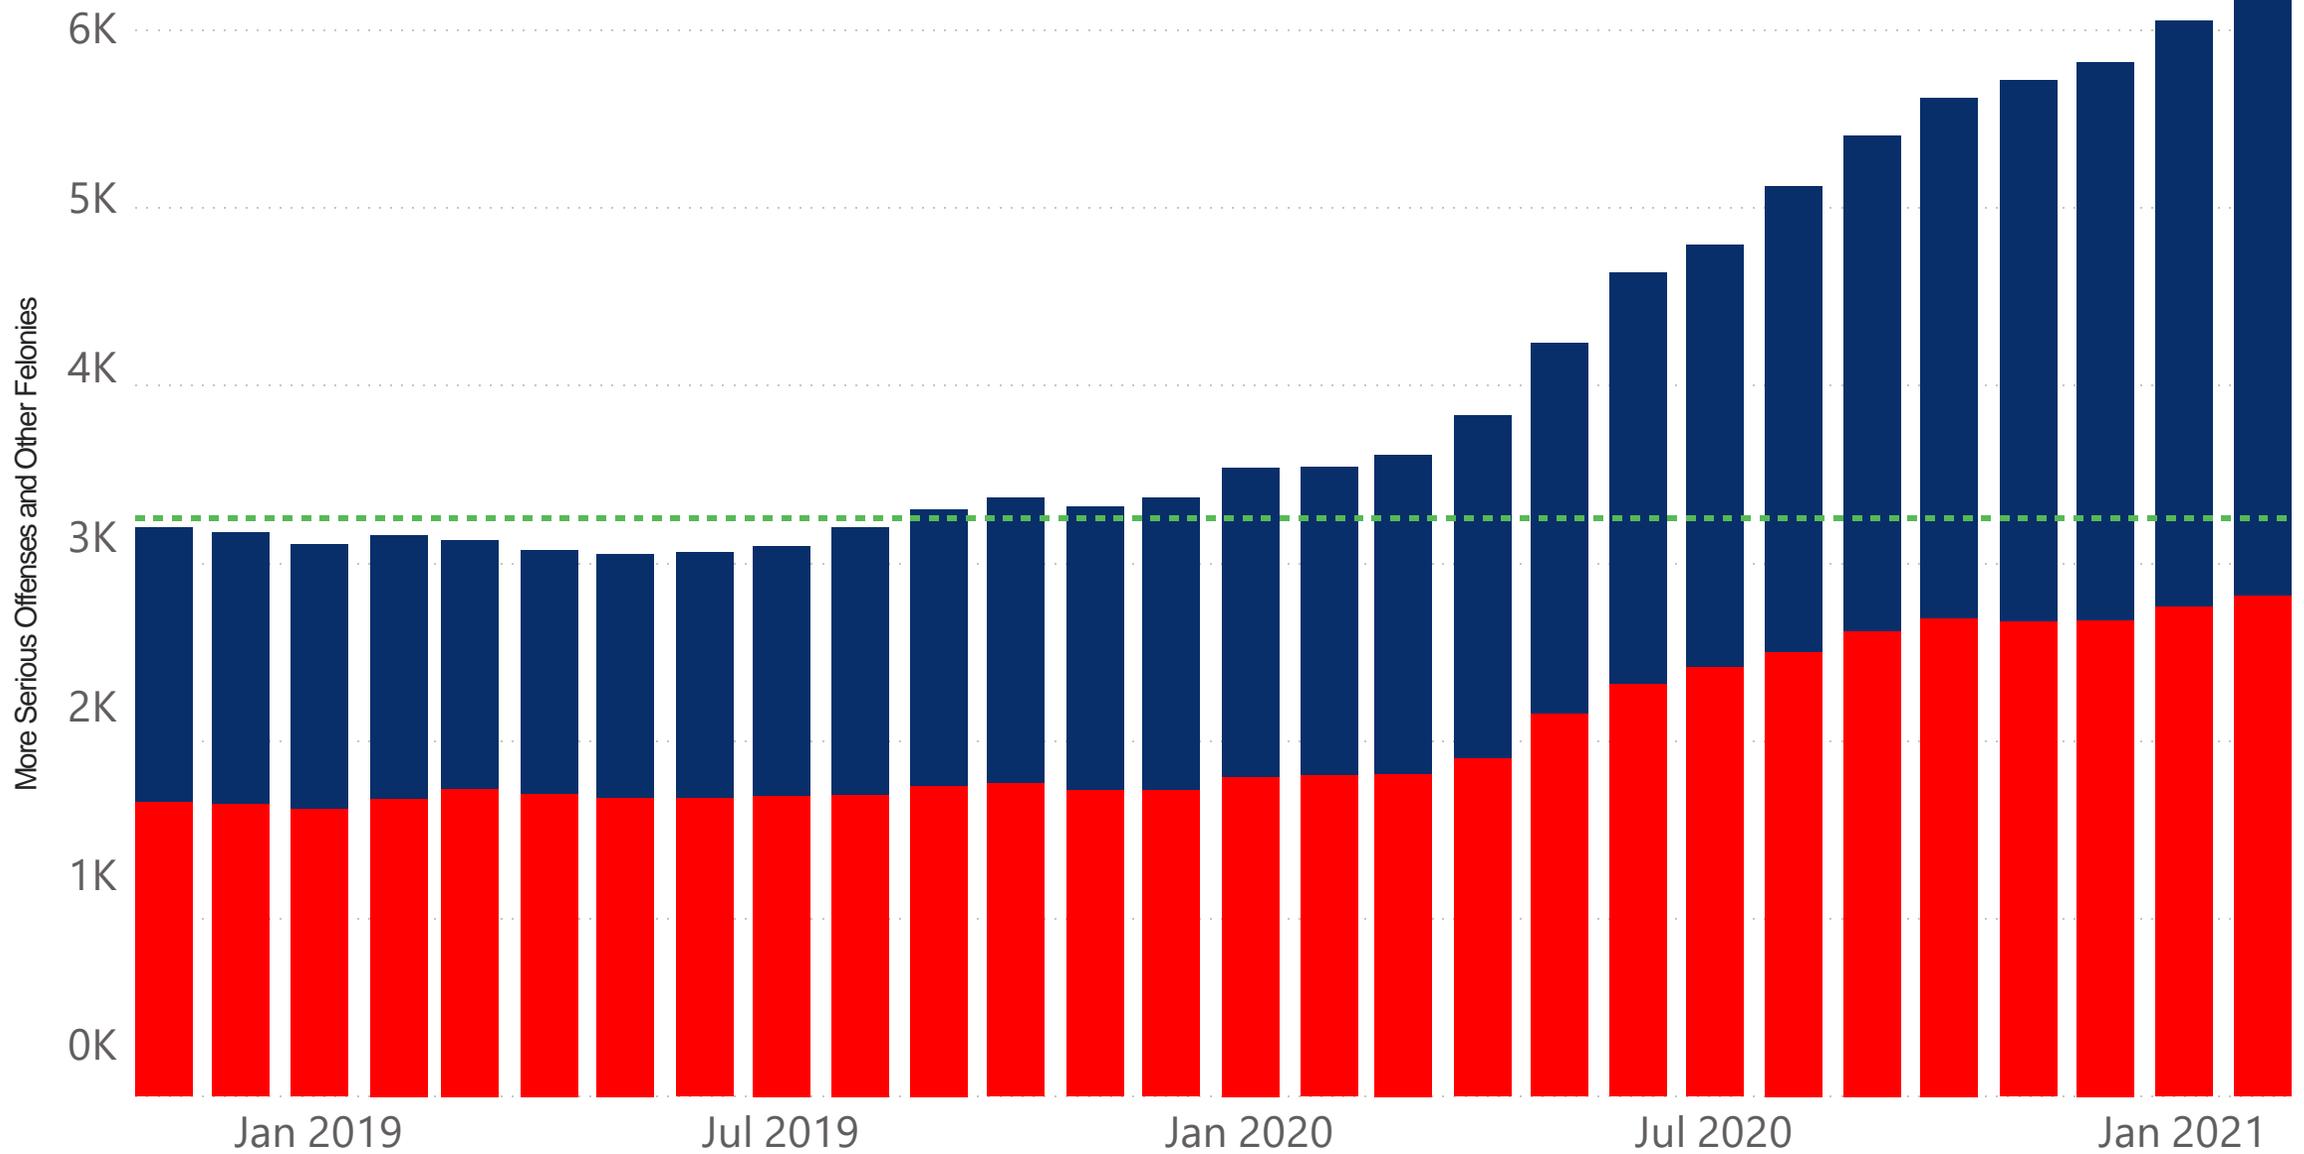

More Serious Offenses

- Pre-COVID we had approximately 1700 “more serious” offenses in the system.
- “More serious” cases include homicide, rape, domestic violence, robbery, shootings.
- Now, we have approximately 2800 “more serious” pending cases.
- Recall that prior to COVID, our entire pending caseload was approximately 3250 cases.
- “More serious” cases take exponentially more resources to prepare, longer to try, and significant work with victims and families.

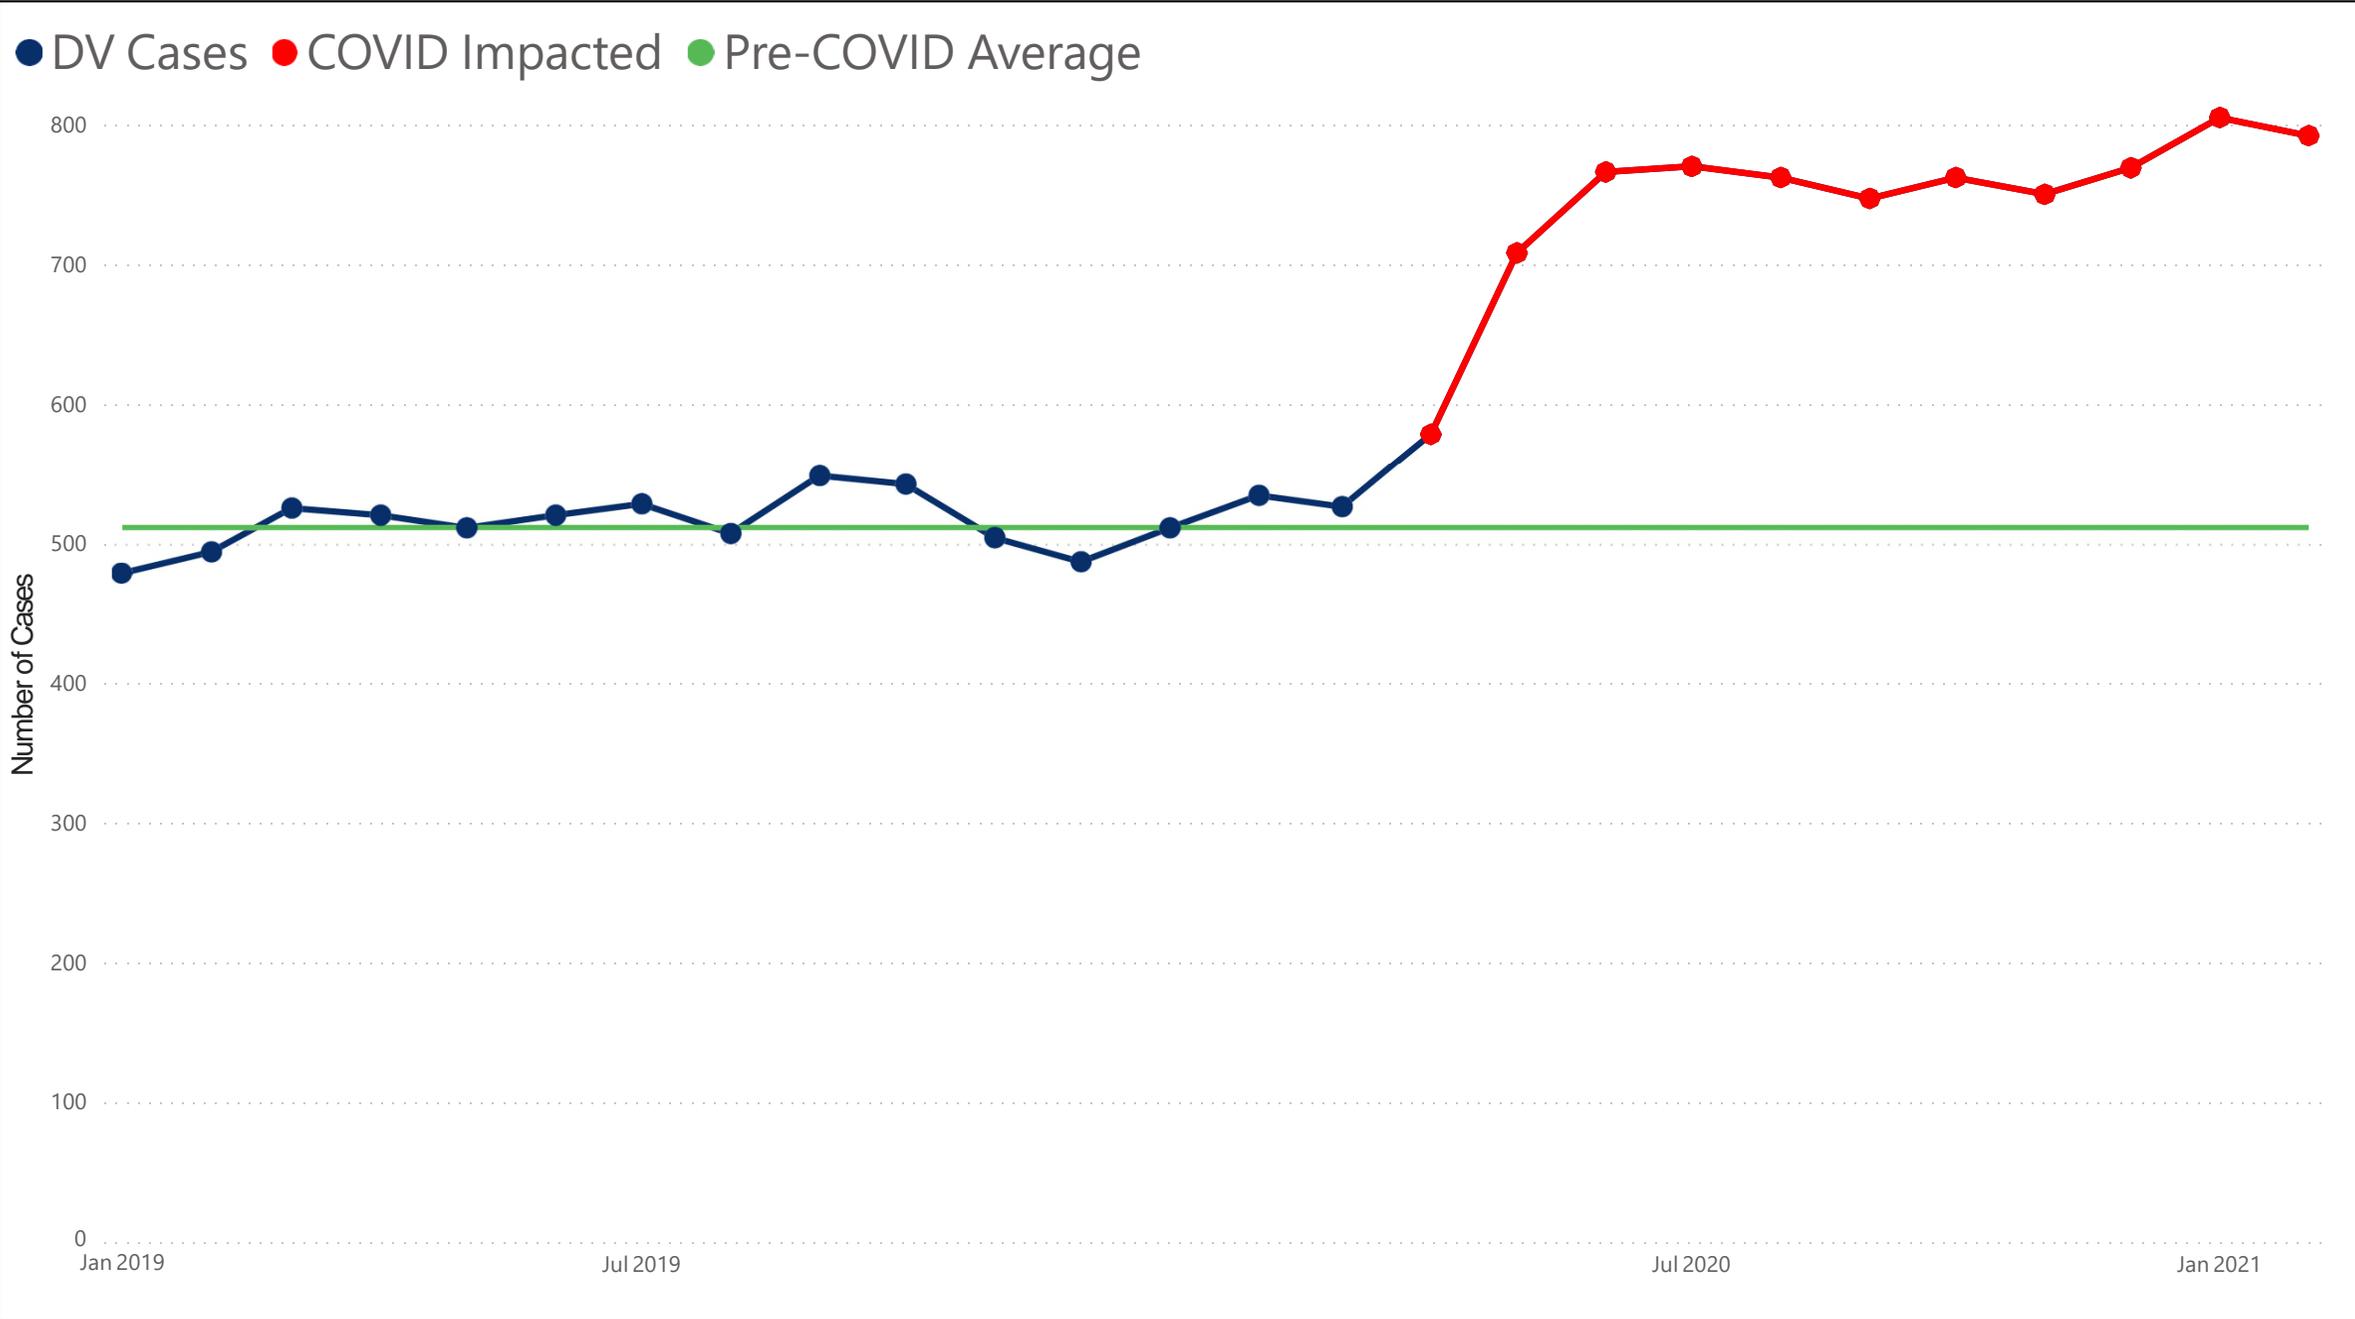

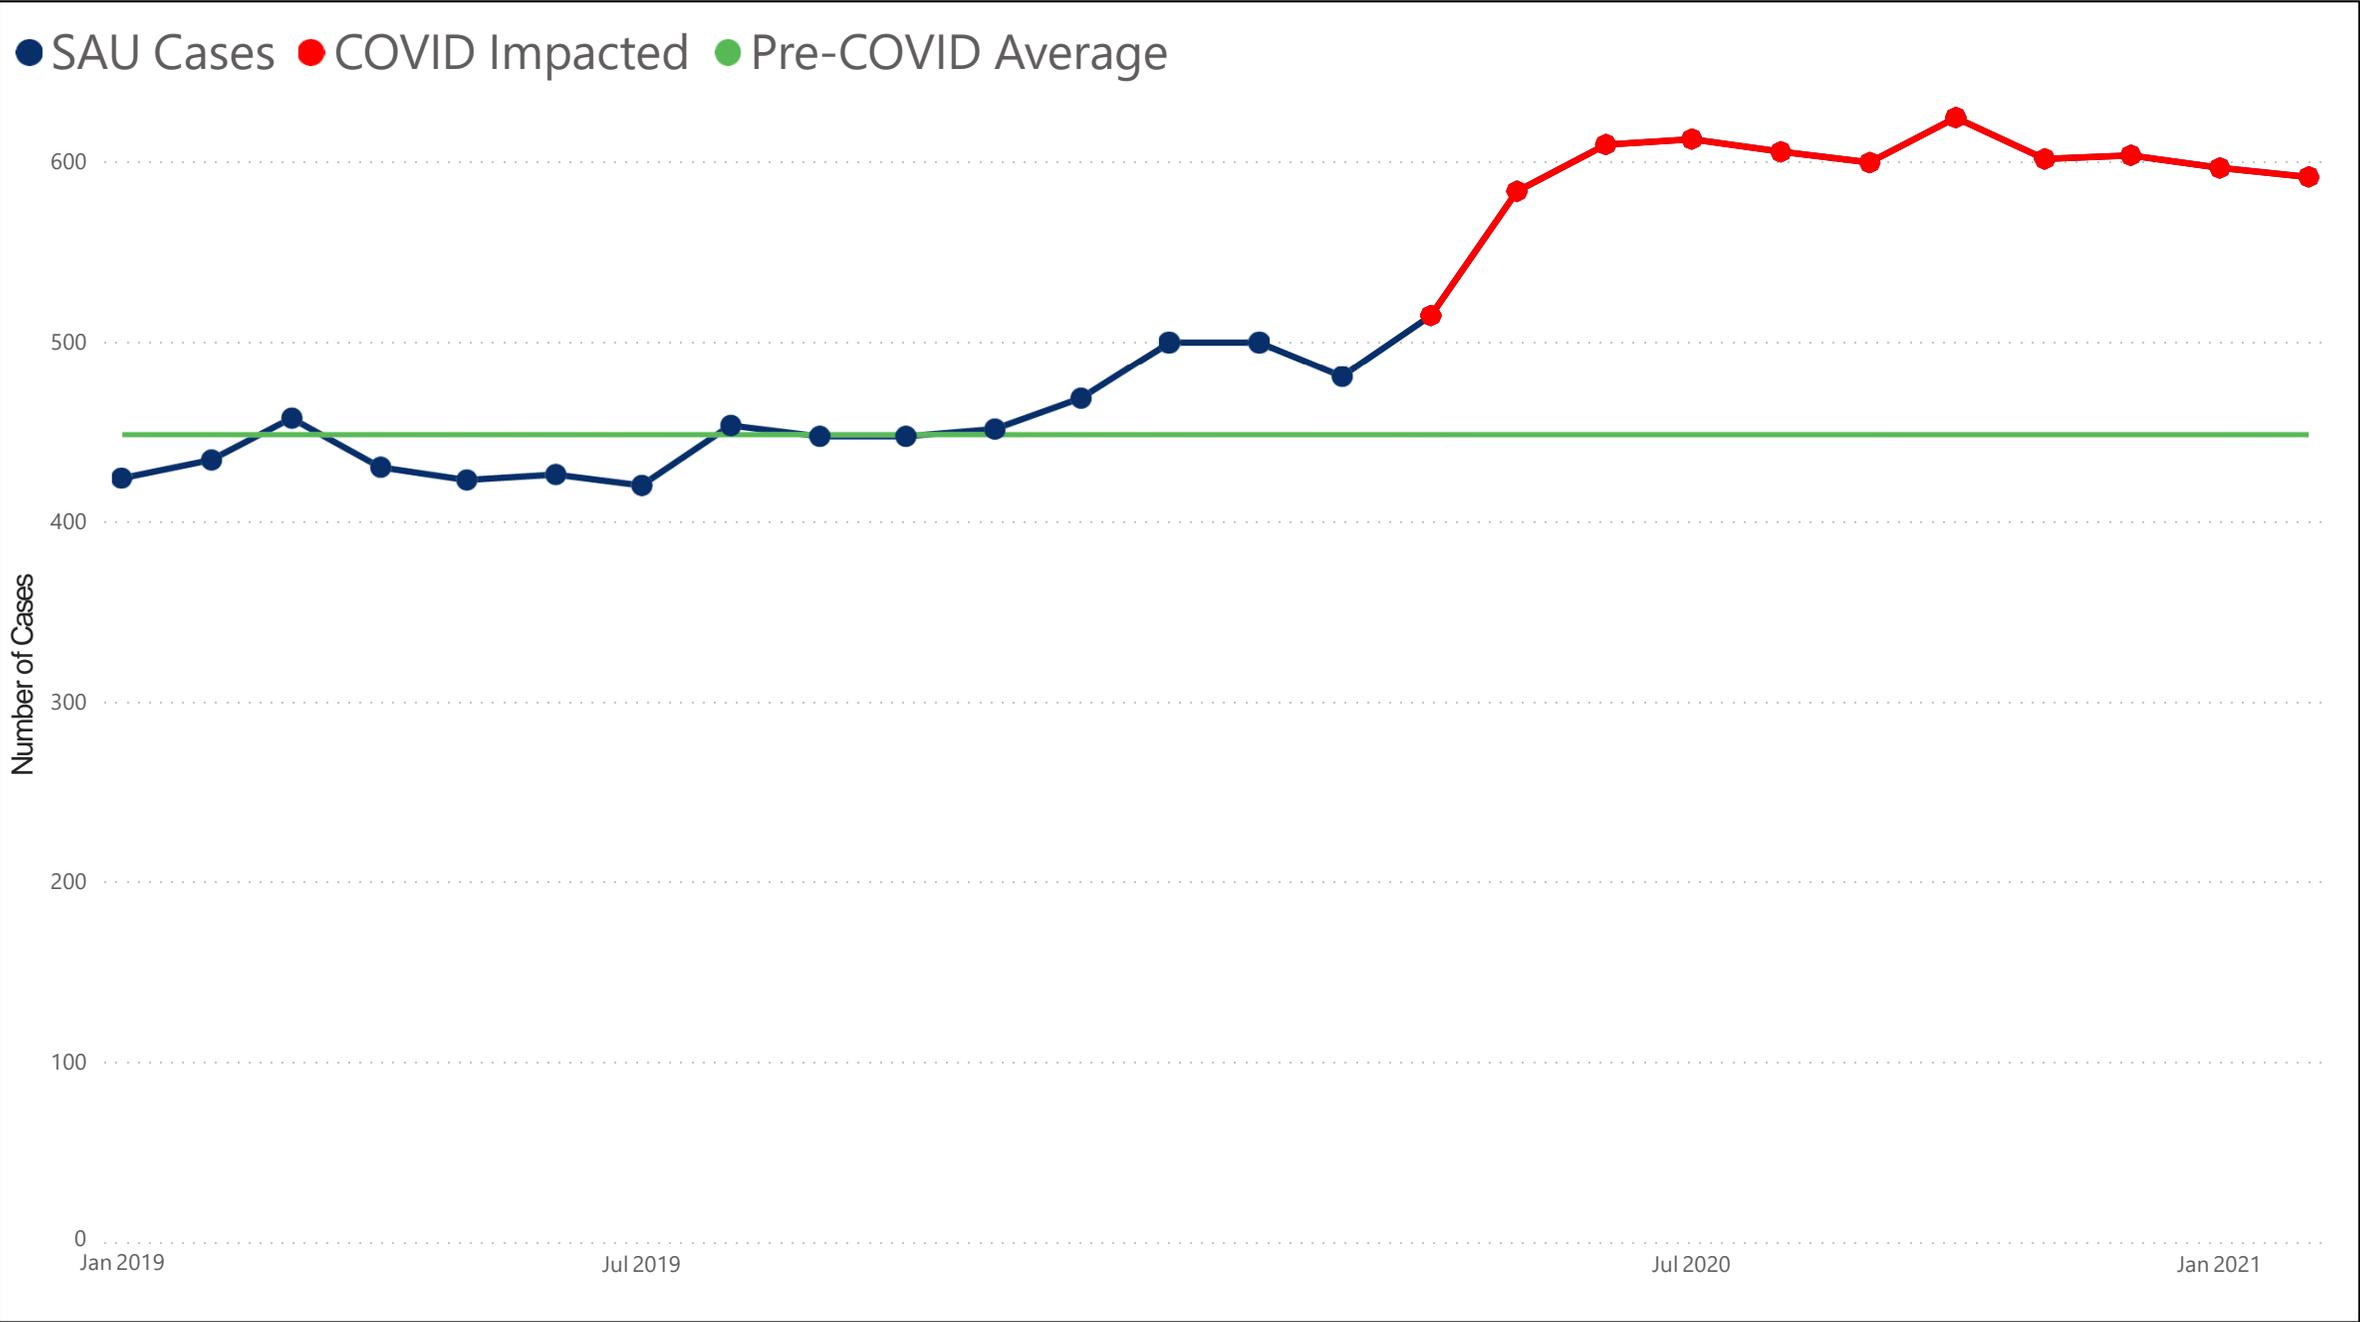

● More Serious Offenses ● Other Felonies

Domestic Violence and SAU Cases

- For DV cases, we have seen a **50%** increase in pending cases.
- For SAU cases, we have seen a **33%** increase in pending cases.

COVID-19 has prevented cases from resolving

Three primary ways a case leaves the system:

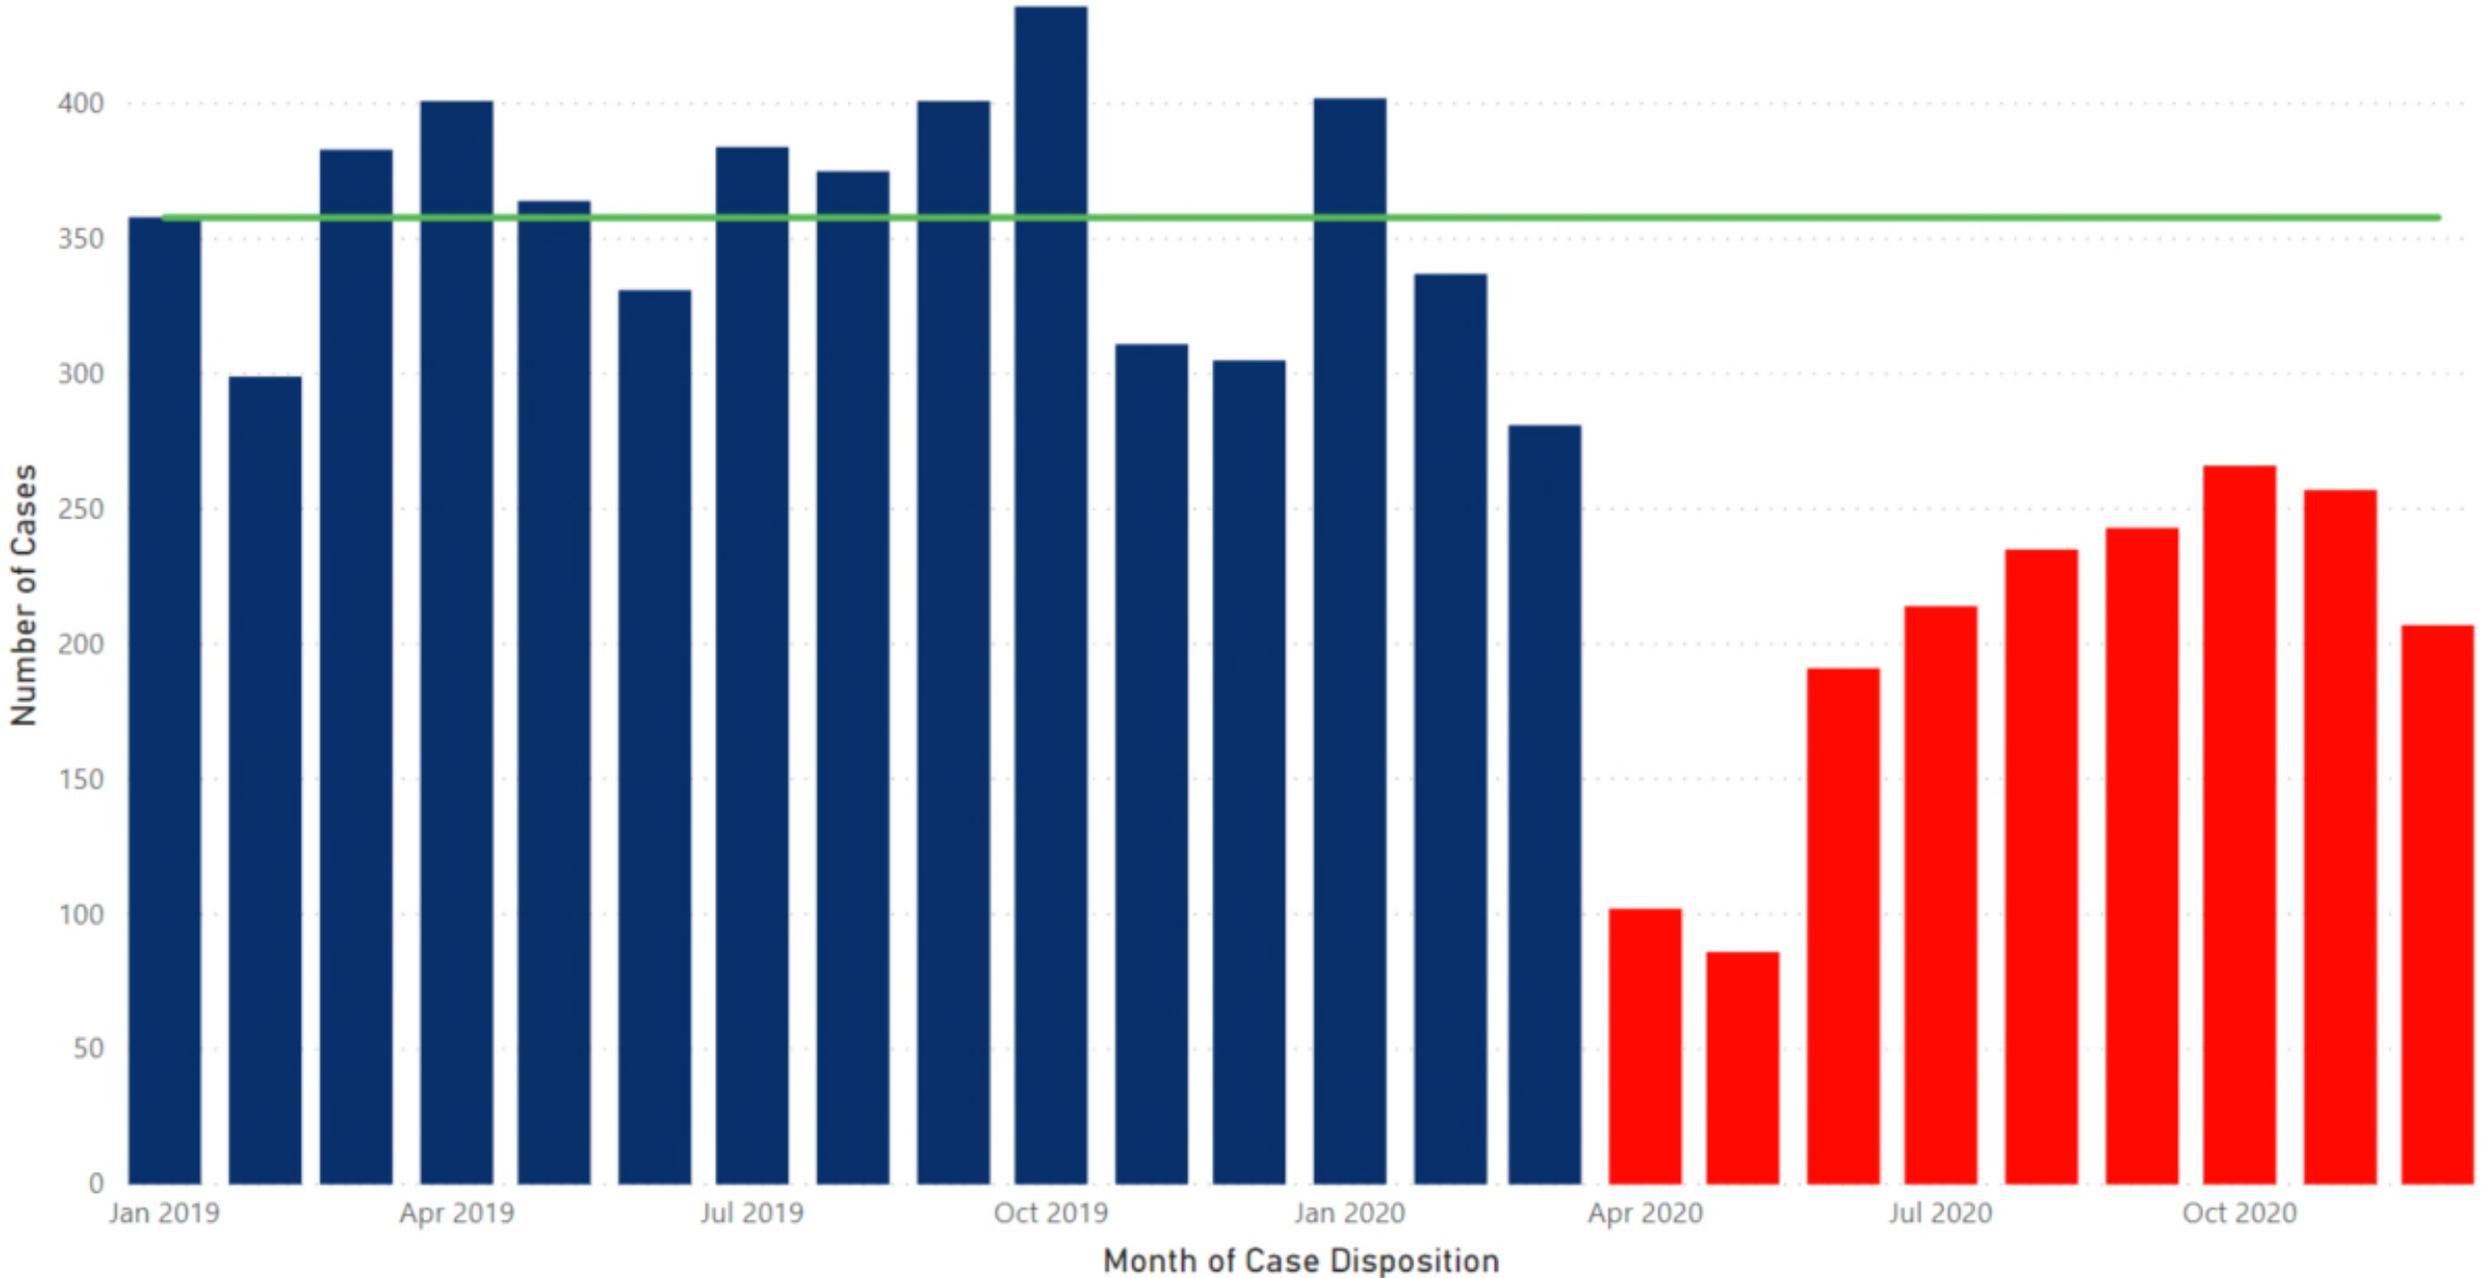

- (1) Guilty Pleas
- (2) Bench Warrants
- (3) Trials

All three exits have been significantly impacted by COVID-19, resulting in unprecedented growth.

At the same time, crime rates continue at pre-COVID rates or higher.

Plea Agreements - Cases Disposed in King County Superior Court by Plea

● Case Dispositions ● COVID Impacted Dispositions ● Pre-COVID-19 Average Dispositions

Pending Homicide Cases & “Call Outs”

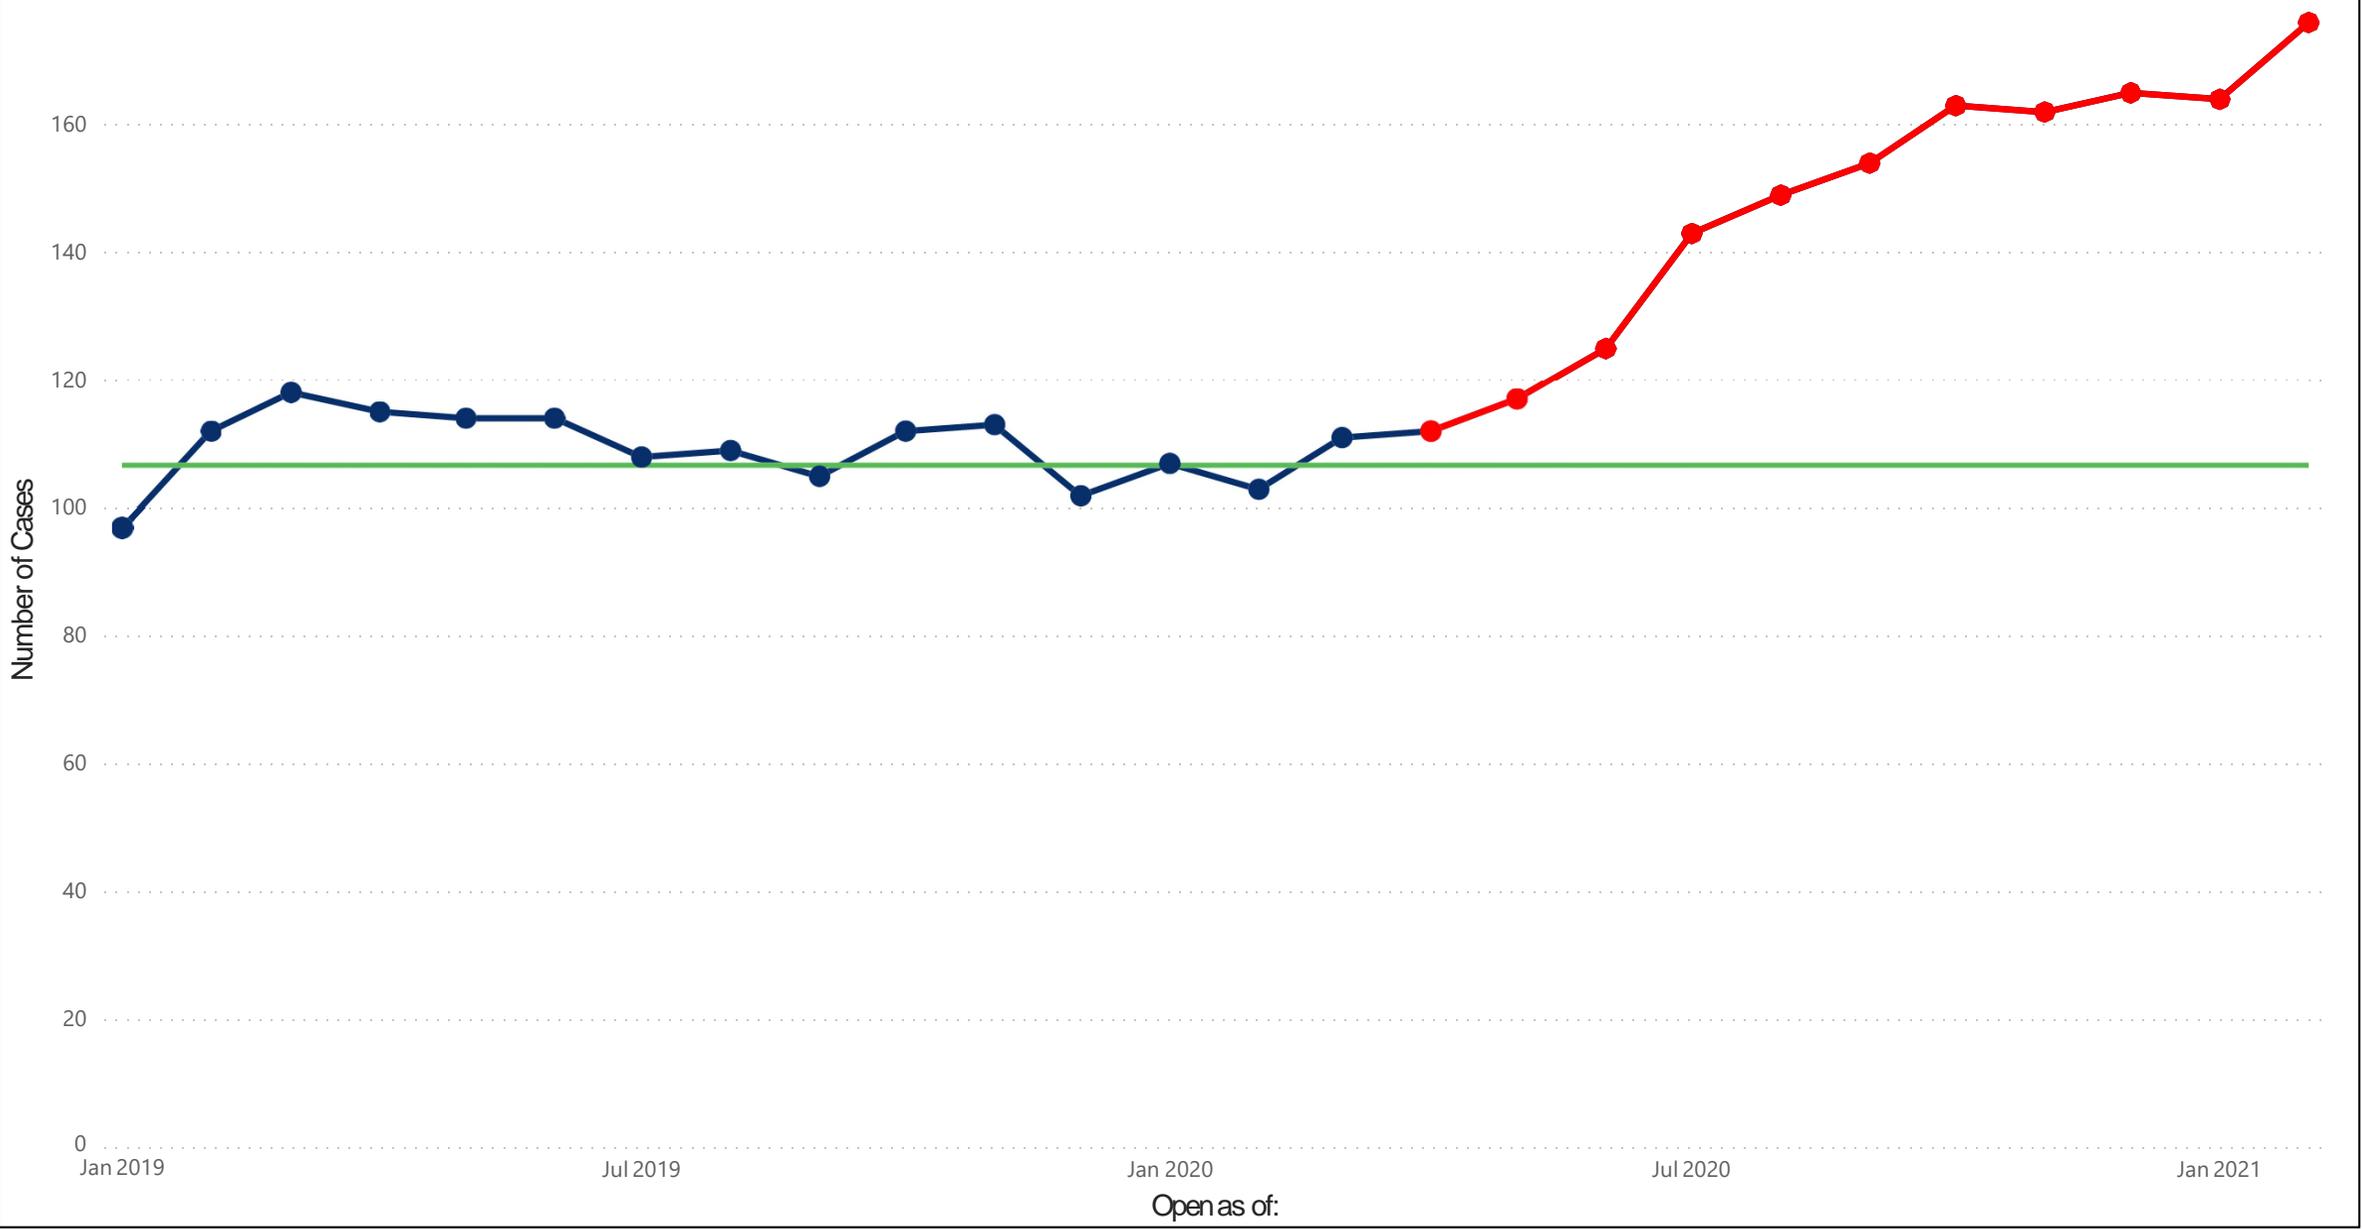

MDOP = Most Dangerous Offender Project (Homicides)

- Average Pre-COVID was **115** pending cases
- Post-COVID, **175** pending cases

Our office responds to homicide scenes to assist police.

- Average call outs per year: **86**
- 2020 call outs: **146**
- 2021 call outs: **13**

● MDOP Cases ● COVID Impacted ● Pre-COVID Average

More Shots Fired in 2020

- 3-year average of shots fired annually: 870
- 2020 shots fired: 1034
- INCREASE in shooting victims: 36% (337 compared with 248)
- INCREASE in fatal shootings: 27%
- Consistent with national trends.

The future is not encouraging

- There are over **3000** unfiled felony cases for us to review.
- We are filing “most serious” and “priority” cases now. We are being thoughtful in our filings understanding the safety issues involved.
- There are **1100** cases set for trial (typically handle 200 trials a year).
- We have been given **no** additional resources to address these issues.
